PRESS RELEASE

**Static Control First to Market with Odyssey® Cartridge Sealing Toner Packs for use in HP® M252 Cartridges**  
*Launch Completes Full OEM-Like System Offering*

Sanford, N.C. – (October 27, 2016) – Static Control has recently launched Odyssey® cartridge sealing toner packs, a unique, first-to-market solution, that rounds out the offering for remanufacturing HP’s CF400 series cartridges used in M252 and M277 printers. This JetIntelligence cartridge series introduced several features such as advanced, smaller chips and a new toner delivery method.

Odyssey cartridge sealing toner pack has an OEM-like fit and function. Filled precisely with the optimal amount of toner, the pack also acts as a seal to prevent cartridge leaking. In a similar way to the OEM, when the seal is broken in the printer, it acts as a toner agitator to help improve flow. This eliminates the occurrence of premature starvation common when using the “drill-and-fill” method popular among remanufacturers. Toner packs are available for A cartridges, with X toner packs to be released soon. Traditional bottled toner is also available.

Last year, Static Control was first to market with replacement chips for the M252 cartridges. Along with chips and toner, an Odyssey drum, wiper blade, end felts, foams, sealing blades and replacement end plates are available. This provides everything needed to successfully remanufacture these cartridges with OEM-comparable image density and page yield.

For remanufacturers who have difficulty locating the hard-to-find, expensive empty, a non-OEM compatible replacement cartridge is also available. These cartridges provide high quality print performance in all printing conditions, such as low and high humidity.

###

Static Control is the largest manufacturer of aftermarket imaging systems and components supporting cartridge remanufacturers within the global laser and ink jet industry. Sales and distribution facilities are located worldwide. Research, development, engineering and manufacturing as well as global distribution are located at Static Control’s world headquarters in Sanford, North Carolina, USA. Static Control manufactures in-house more than 10,000 imaging products and offers a product catalog of more than 14,000 imaging products to the aftermarket industry.
