Universal Replacement HP® Color LaserJet®

Static Control Part Number: RCCE340AU, RCCE341AU, RCCE342AU, RCCE343AU

Our remanufactured universal cartridge offers a unique opportunity: one cartridge that can be used in multiple printers. This provides the convenience of stocking one cartridge for multiple SKUs. If that's not enough to win you over, our solution offers an extended yield in the CE740 series of cartridges. This one-of-a-kind solution is available exclusively from Static Control.

OEM SKU	Printers	Page Yield			OEM MSRP†	First Page Out	Print Speeds
		OEM Stated	OEM Actual*	Static Actual			
CE340A	HP LaserJet Enterprise 700 Color MFP M775	13,500	16,000	16,000	$189.99	10.5 secs	30ppm
CE341A, CE342A, CE343A		16,000	11,000	11,000	$477.99		
CE740A	HP Color LaserJet Professional CP5225	7,000		16,000	$168.99	16 secs	20ppm
CE741A, CE742A, CE743A		7,300		11,000	$296.99	17 secs	
CE270A	HP Color LaserJet Professional CP5525, HP Color LaserJet Enterprise M750	13,500	16,000	16,000	$274.99	10 secs	30ppm
CE271A, CE272A, CE273A		15,000	11,000	11,000	$448.99		

*These numbers are based on Static Control's print laboratory results of the OEM cartridge. Our testing is designed to evaluate the print performance throughout the entire life of the cartridge while in various environmental conditions.

Universal
Static Control develops unique solutions to give your business a key advantage. Our universal solutions mean that one product can be used in multiple printers, saving you money and inventory space.

Quality Control
Static Control's three-stage, APQP-defined quality process ensures your cartridge performs to the highest standards. From qualification, through assembly at our factories and onto inbound reception at our distribution center, our cartridges are subjected to multiple rounds of AQL-based destructive testing and 100% post-testing.

Warranty
Our laser cartridges are guaranteed to be free of defects for two years from purchase date.

Accurate Reporting
Static Control has been setting the industry standards in chip reliability and accuracy since chips were introduced on cartridges.

System Development
Our world-class R&D facilities and 30 years' experience allow us unmatched knowledge into the science of each cartridge component. It is with that thorough understanding that we engineer the ultimate complete imaging systems to power our cartridges.

About Static Control:
For 30 years Static Control has developed and manufactured the components that go inside of printer cartridges, from our Sanford, NC world headquarters. Building upon our reputation as the technology and quality leader of aftermarket imaging systems, Static Control brings new levels of stability to the industry through our finished cartridge offerings.
