

QUALITY
BEGINS WITH
KNOWLEDGE

DEVELOPMENT & MANUFACTURING EXPERTISE

Static Control has developed and manufactured the internal components inside laser/toner and ink jet cartridges for more than three decades. Our innovations helped grow the remanufacturing business from its meager beginnings to the industry it is today.

We were the first provider of aftermarket chips. Our chip development group continues to reverse engineer solutions that provide accurate page counts to customers while being firmware resistant to OEM updates.

Our components are developed as a system to work together and provide flawless prints. We know the importance of the charge of toner, the thickness of the wiper blade, and how it all works with the OPC drum. This synchronicity is why our quality is unmatched.

This knowledge is packed into each of our cartridge solutions so you can have confidence in every printed page.

If you have ever used a high-quality aftermarket cartridge, it likely contained Static Control technology.

STATIC CONTROL KNOWS CARTRIDGES BETTER THAN ANYONE ELSE

Our research and development team has a deep understanding of how OEM cartridges work and perform. Comparative testing of both OEM and other aftermarket offerings ensures we set performance standards that meet or exceed our customers' expectations.

Our print lab is 30,000 square feet and conducts hundreds of print tests in various humidity environments to provide superior performance in all climates.

Static Control's quality control team post-tests all our innovations, both at the factory and upon arrival. We have the highest standards in the industry so our products offer a level of quality unmatched in the aftermarket.

RoHS

STATIC CONTROL'S FULL CARTRIDGE LINE PROVIDES PERFORMANCE

REMANUFACTURED

Our remanufactured cartridges are an environmentally friendly solution that delivers reliability and high-quality performance. Built using our proprietary components, no one knows cartridges like Static Control.

COMPATIBLE

We have the best compatibles in the industry thanks to our unmatched quality control.

Post-tested both at the factory and upon arrival, you can rely on Static Control's first-to-market solutions.

EXTENDED YIELD

Our unique offering of extended yield cartridges can save you money by providing a lower cost-per-page. This is a great solution for MPS environments.

INK JET CARTRIDGES

Static Control's ink jet cartridge line provides rich, colorful prints from start to finish. Each cartridge offers accurate page count numbers and are the highest level of resistance to OEM firmware changes.

STATIC CONTROL OFFERS A3/MPS COPIER PRODUCTS!

- Meets OEM page yield
- Premium Performance
- IP considerate
- 3-Year warranty

Our copier products are developed and manufactured to meet the OEM-stated page yield. Each cartridge undergoes rigorous quality control and is tested to ensure maximum quality is delivered to you.

Our offering includes solutions for popular Canon®, Ricoh®, Kyocera®, Konica Minolta® copiers and more!

THE STATIC CONTROL DIFFERENCE

- Our proprietary toner formulations are developed in-house to provide premium performance in image density and page yield
- Our components are engineered as a system to work seamlessly together
- Each cartridge is built with our unique bill of materials to deliver optimal performance on every printed page
- These premium solutions are only available from Static Control

PLASTIC-FREE PACKAGING FOR TONER CARTRIDGES*

- 100% recyclable
- Biodegradable paper bag
- Humidity proof
- Provides great product protection

A TRULY SUSTAINABLE OPTION!

BESPOKE PACKAGING

Static Control offers custom boxes designed specifically for your business.

*For plastic-free options, contact sales.

LOGO LABEL

Our labels can be customised to highlight your business name and logo.

GLOBAL REACH LOCAL SUPPORT

Static Control provides award-winning customer support throughout all of Europe. Our sales team speaks more than twenty languages and can assist you with all your imaging needs.

STATIC CONTROL IS A GLOBAL COMPANY WITH OFFICES AND DISTRIBUTION CENTERS AROUND THE WORLD.

Our team has one global mission - to provide quality service while designing, producing and distributing premium imaging solutions to communities around the world.
