

How to Disable Automatic Firmware Updates in Select HP Printers

In the HP LaserJet M255, M282/M283 MFP and related printer models:

On printer screen, select the **Setup** option, then select **Service**:

Select **Service**:

Select **LaserJet Update**:

An information paragraph may appear. Click **Next**:

3010 Lee Avenue • PO Box 152 • Sanford, NC 27331 • United States

Click **Always Prompt**:

This will return you to the Manage Updates page. Click **Check Automatically**:

Select **Off**:

You have now disabled automatic firmware updates in this printer.

Note that printer interfaces can vary between different models, so prompts may be in a different order but the instructions are generally the same across models. For more information, reach out directly to your sales representative.
